Go Mobile, Stay Safe.

Today, doing anything and everything on your mobile phone is extremely easy – often too easy. Here are some simple tips to help keep your money, and personal information safe.

Treat your smart phone like a computer: It may be smaller but contains similar confidential information. Be sure to set a logon password to protect your information should you lose your phone. If you have the option to use two-factor authentication, take advantage of this added security feature.

Do not connect to open Wi-Fi: When you are unsure of exactly where you are connecting to, each time you enter a password or credit card number, you may be exposing it to hackers. Check that you are not automatically connecting to public Wi-Fi and disable automatic connection on all your devices.

Never save passwords in a text document: Never save sensitive data or passwords to a text document on your phone.

Think before you download: Only download apps from trusted sources. Check the reviews and make sure the app you're downloading is safe and official.

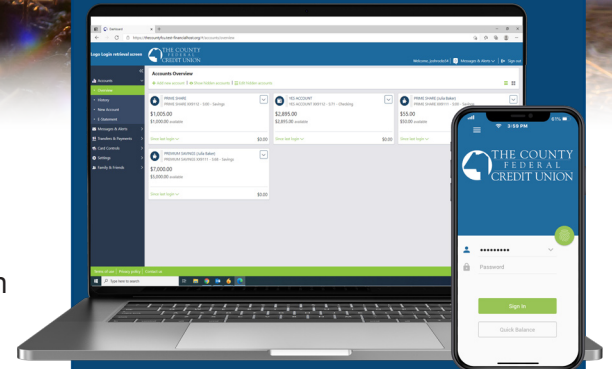

Equip your smart phone with protection: Take advantage of low-cost malware and virus protection.

Leave your smart phone someplace safe: If you don't, "hacking" can be as simple as someone else turning on your phone.

Always update your phone's Operating System when available: These updates help protect your device and your information.

No smart-phone is totally immune to hackers and cyber criminals, but by following the steps above, you can significantly reduce your risk of becoming a victim of fraud.

New Online Banking Platform Coming this Summer!

While County MoGO mobile banking will still have its safe, easy to navigate look and feel, our Online Banking digital banking experience has been re-imagined from the ground up. It is the next generation of online digital banking and it has a unified experience from one device to another. It's coming midsummer and we think you will love it. As usual, we will give you plenty of notice and will help you transition to the new improved platform when its time.

Thinking about some renovations this summer?

Nearly three-fourths of Americans are planning a home improvement project this year, according to an annual national survey. Many of them are likely to be thinking of renovations that will increase the value of their property.

According to the most recent Cost versus Value survey by Remodeling Magazine, the following projects should come closest to paying for themselves and offers the best Return on Investment (ROI).

- Insulating the attic 117% ROI
- Replacing Entry Door 91% ROI
- Refreshing Kitchen 83% ROI
- Bathroom Addition 81% ROI
- Installing New Siding 75% ROI
- Building a Deck 75% ROI
- Attic Bedroom 73% ROI

If you would rather not pay for home renovations out of your savings, you needn't go far to find resources. At The County FCU, we offer members several ways to finance remodeling, from home improvement loans to equity lines of credit. If your home has gained some value recently, another option is to refinance an older mortgage to free up cash for improvements. Get in touch with one of our loan officers, and let's discuss the best options for you.

The County offers fixed and variable rate home equity loans for home improvements, debt consolidation, or that dream vacation with several term options to fit your needs. Stop in, call or visit CountyFCU.org or PenobscotFCU.com today.
